

Sliquid Naturals SILVER

CYCLOPENTASILOXANE - This premium silicone is the one that keeps everyone coming back for more. It is the most expensive, and the most luxurious, yet it is the key silicone compound that makes our silicone intimate lubricant ultra slick due to its water-thin consistency, helping to deliver the heavier silicone(s). As a volatile silicone it quickly evaporates into the air after delivering nutrients to the skin.

DIMETHICONE - Used for it's skin conditioning properties, this superior silicone is the most commonly recognized in the cosmetic industry. Dimethicone forms a protective barrier to help lock-in moisture and reduce naturally occurring body friction.

DIMETHICONOL - An ideal polymer and emollient that is anti-foaming and great for moisturizing. Dimethiconol is heavier than most silicones. When combined with other silicones it helps to better deliver the formula to the skin, making it an ideal skin protectant with a unique fluidity.

Important: Do not use if safety seal is broken/missing. Should any irritation occur, discontinue use at once. Keep out of children's reach.

.....
Naturals Silver is a proprietary blend of pharmaceutical grade silicones creating a luxurious intimate lubricant, and is Sliquid's Premium formulation. Naturals Silver is super long lasting and 100% water resistant, and is the perfect choice for those who need a long lasting glide, or for those looking to enhance their bathtub, shower or hot-tub play. Made from an ultra concentrated blend of dimethicone, dimethiconol and cyclopentasiloxane, Sliquid Naturals Silver will last for hours with only a few drops, and is easy to clean up with soap and water. Silver is ideal for sensual massage, but not recommended when using silicone toys and products.
